The 52/TX is a multitouch mixing console with an intuitive control interface for daily operation at news desks, as co-host panels, in editing suites and in SNGs.

Its flat table-top design, with a 10.1" multitouch display, two assignable potentiometers and six hardware buttons, allows professional audio mixing on a small footprint.

With the integrated high-quality microphone input and headphone output, the most important connectors are available directly in the device for telephone interviews or dubbing.

Featuring a built-in talkback microphone and loudspeaker, the 52/TX is also a perfect talkback unit or monitoring controller.

One single network cable connects the 52/TX to a core or concentrator. It transmits all audio and control signals and also provides power for this device. The 52/TX can be operated with a maximum distance of 100 m from the core.

With the Toolbox9 configuration software you can create your individual mixer layout that fits your workflow best. You can define number and size of faders, buttons with your required functions and, of course, peak meters to show selected signal levels.

The 52/TX can be used with any of our DSP cores as a stand-alone mixing console or as an extension of larger DHD systems.

Features

- fully customisable user interface
- 10.1" high-resolution multitouch display, IPS, capacitive touch screen
- 6 hardware buttons and 2 potentiometers for direct access to the most important functions
- professional microphone input and headphone output
- integrated talkback microphone and loudspeaker
- 1 APC port to connect to a DHD core or concentrator
- slots for cable lock
- VESA 100 hole pattern on the bottom
- table-top design

52/TX Bundle

The 52/TX console is also available as bundle (52-1996). When ordering a bundle, you will benefit from permanent availability from stock and from a very attractive package price.

A 52/TX bundle contains the complete hardware for a multitouch mixing console with up to 8 faders for broadcast applications. The package includes:

- 10.1" multitouch control unit (52-1156)
- 19" rack unit (1U) XS2 I/O Core (52-1830)
- 48 V power supply (52-1948)

The "Extended Feature Upgrade" license (52-1950) is also part of the bundle. It allows individual configuration customised to your workflow.
